OBJECTIVE

Final-year B.Tech student in Artificial Intelligence and Data Science branch , currently working as a Python Developer Trainee at ATS Global Tech. Seeking for an opportunity to apply my skills in Python, Django framework to contribute to impactful backend projects and grow as a backend developer.

EDUCATION

Bachelor of technology : Rajasthan Technical University

Expected 2026

Specialization : AI & DS

8.0 CGPA

SKILLS

Programming Languages	Django, Python, RestFrameworkAPI, MySQL, Java, C++
Databases	SQL
Soft Skills	Communication skill, Collaboration

PROJECTS

CRM Backend System (Python, Django REST Framework, MySQL)

- Built CRM backend using **Django REST Framework + MySQL**.
- CRUD APIs for leads, customers, tickets, services.
- Filters, search, pagination, ordering implemented.
- Postman tested, clean modular code, Git/GitHub used.
- JWT Auth + Role-Based Access implemented.

Hotel Management System (Python , Django REST Framework, MySQL)

- Developed a scalable Hotel Management System backend using Django and Django REST Framework with RESTful APIs.
- Implemented JWT-based authentication and role-based access control (Admin, Staff, Super Admin) for secure operations.
- Designed multi-module architecture covering bookings, check-in/check-out, billing & payments.
- Optimized database performance using slug-based APIs, select_related, prefetch_related, and query annotations.
- Built real-time dashboard analytics and reports with automated tax calculations, status tracking, and pagination.

EXPERIENCE

Python Developer - ATS Global Tech

Oct 2025 - Present

- Developed and maintained backend web applications using Django.
- Integrated and applied CRUD operation using django backend.
- Implemented authentication and authorization using JWT and Django's built-in user management
- Designed and developed RESTful APIs using Python, Django, and Django REST Framework.

AI/ML - Ice Hut Technologies

June - Aug 2025

- Enhanced python programming language with OOP's concept and and applied them in projects.
- Built and evaluated simple models using Python libraries and gained knowledge about core ML concepts.

Advanced Data Structure and Algorithm using Java - Geekster

April - May 2024

- Completed training covering the DSA concepts like Trees, Graphs, Dynamic Programming, SortingSearching algorithms.
- Implemented a solutions in Java with a focus on time and space optimization.

CERTIFICATION
