OBJECTIVE

Python Backend & AI Developer with experience in building scalable backend systems and production-ready AI applications using Python, Django, FastAPI, REST APIs, LLMs, RAG, Vector Embeddings, and AI Agents. Passionate about designing high-performance, intelligent backend architectures focused on scalability, automation, and real-world problem solving.

EXPERIENCE

Python AI Developer - Welfog

Feb 2026 - Present

- Developed a production-grade multilingual AI Customer Support Agent using FastAPI, Python, LLMs, and RAG architecture.
- Implemented semantic search using Vector Embeddings to improve response accuracy from enterprise knowledge bases.
- Built modular FastAPI services following clean architecture, reusable components, and scalable API design.
- Integrated multiple LLM providers with automatic fallback mechanisms for higher availability and reliability.
- Improved overall backend performance by implementing asynchronous processing and optimized API workflows.

Python Developer - ATS Global Tech

Oct 2025 - Jan 2026

- Developed and maintained backend web applications using Django.
- Implemented authentication and authorization using JWT and Django's built-in user management
- Designed and developed RESTful APIs using Python, Django, and Django REST Framework.

PROJECTS

AI Customer Support Agent(Python, FastAPI, Generative AI, RAG, LLM, Vector Embeddings)

- Designed and developed a production-grade multilingual AI Customer Support Agent for an e-commerce platform.
- Built a Retrieval-Augmented Generation (RAG) pipeline to deliver accurate, context-aware responses from enterprise knowledge bases.
- Implemented Vector Embeddings and semantic search for intelligent information retrieval.
- Integrated multiple LLM providers with dynamic fallback mechanisms for improved reliability and reduced downtime.

Hotel Management System (Python , Django REST Framework, MySQL)

- Developed a scalable Hotel Management System backend using Django and Django REST Framework with RESTful APIs.
- Implemented JWT-based authentication and role-based access control (Admin, Staff, Super Admin) for secure operations.
- Optimized AI response latency by minimizing unnecessary LLM calls through intelligent caching and routing strategies.
- Developed scalable FastAPI services following modular architecture and clean API design principles.
- Integrated backend APIs for Product Search, Returns, Refunds, Tracking, Wishlist, and Customer Support operations.

SKILLS

Languages : Python, Java, C++, SQL

Backend Technologies : Django, Django REST Framework, FastAPI, REST APIs

Generative AI: LLM, RAG, Vector Embeddings, AI Agents, Prompt Engineering, Semantic Search

Tools: Git, GitHub, Postman, Cursor AI

Databases: MySQL, SQLite

EDUCATION

Bachelor of technology : Rajasthan Technical University

2022 - 2026

Specialization : AI & DS

8.0 CGPA

CERTIFICATION

- Artificial Intelligence And Machine Learning – Ice Hut
- Advance DSA – Geekster

(June 2025)

(July 2024)
